

GrowHealthyTogether

PATHWAYS COMMUNITY HUB

HOW IT WORKS

The Grow Healthy Together Pathways Community HUB is a data driven community-wide system that connects low-income residents to needed medical care and social services to improve health outcomes. Key to the program are Community Health Workers (CHWs), who provide care coordination services and are employed by numerous clinical, social service agencies and other organizations throughout the community.

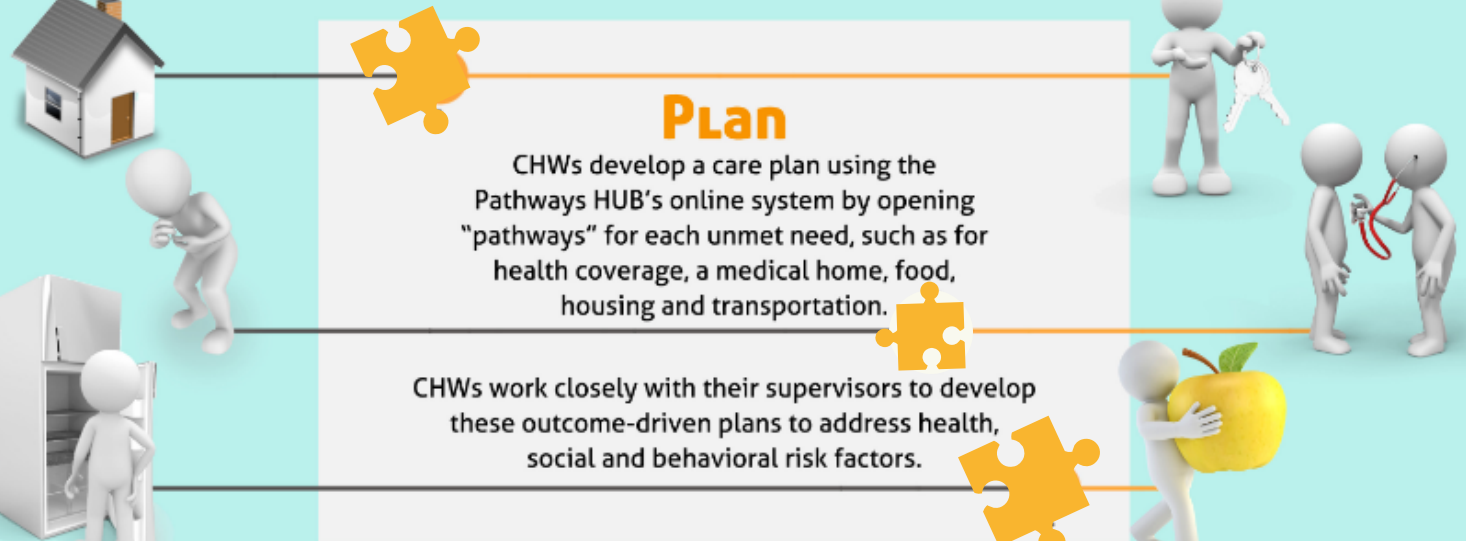

COMMUNITY HEALTH WORKERS SERVE AS PARTNERS, COACHES AND ADVOCATES FOR THEIR CLIENTS.

Enroll
CHWs canvass the community for at-risk residents and enroll them in care coordination. Healthcare providers and others also refer patients to the Pathways HUB.

Assess
Enrolled clients receive a comprehensive risk assessment, and they work with their CHWs to prioritize all their health and social needs.

Plan
CHWs develop a care plan using the Pathways HUB's online system by opening "pathways" for each unmet need, such as for health coverage, a medical home, food, housing and transportation.
CHWs work closely with their supervisors to develop these outcome-driven plans to address health, social and behavioral risk factors.

Meet
Clients meet with their CHWs at least monthly to work as a team on care coordination plans, and they address each need one by one.

Track
Pathways HUB staff tracks data to reduce duplication of services and ensure clients receive the most appropriate high-quality, evidence-based services.

Train
Staff at the Pathways HUB provide training and education for both CHWs and their supervisors.

Pay
Organizations employing CHWs receive payments from Medicaid managed care plans and other funding partners when clients are successfully connected to needed medical and social services and achieve important health outcomes.
